Neće više biti bodovani za Prvenstvo Hrvatske, ali u prvenstvu Europe za njih počinje treći dan!

Šebalj/Klinc crew managed to repair their Mitshubishi Lancer EVO IX and continue with the competition. They are using SUPERally format which is custom for European championship races where bonus points for each day are collected separately, meaning they have to be among fastest three crews. They won't collect any points for Croatian Championship but as far as European championship is concerned they are back in the race!
